

# ALPINE UNIVERSE

*"Impressive and entertaining set from French DJ/producer Alpine" - Deana Rilling of DJ Times Magazine*

**BIO:** Alpine Universe was created by French composer and multi-instrumentalist Andy Favre. Best known for winning the Insomniac Discovery Project and performing in front of thousands of people at festivals such as DadaLand: The Voyage (opening for Dada Life), the Fire Mix Party (France) or Nocturnal Wonderland (California) alongside with Alesso, Pretty Lights, Axwell, Benny Benassi and many others..

*"An epic adventure" - DanceandRave.com*

Where electronic music events mostly revolve around DJs, Alpine Universe performs the genre in a more organic and 100% live setting. As such, he takes the stage with an array of electronic instruments namely electronic drums, synthesizers, effects, and even electronic accordion. Ecstatic crowds are introduced to an energetic sound with the power of a full symphonic orchestra.

*"Symphonic-electro sound awes festival crowds" - TrapStyle.com*

Alpine Universe's music has been featured in major commercials, movies and enjoys a vast success cumulating millions of streams on music platforms such as Spotify, Soundcloud and Youtube.
